

## Wire you can count on

At AGRO our focus is on quality. Our more than 70 years of manufacturing experience and product innovation allows us to produce the highest quality speciality steel spring wire possible.

**The difference is in the details:**

**AGRO Steel Wire – our state of the art manufacturing facility is the acknowledged leader in Europe for bedding and seating wire.**

**Steel that is processed in AGRO Steel Wire is manufactured by our network of select steel rod producers. Their products have a special composition and are subjected to continuous and rigorous testing to ensure they meet AGRO's high standards.**

**The unique composition of AGRO's steel wire, combined with our manufacturing expertise and the supply chain quality focus, creates a longer lasting and more durable wire.**

This quality and consistency is measured in our onsite testing lab and proven around the world in both residential and commercial applications. Customers of AGRO show their confidence in our products on a daily basis by offering longer warranties, some up to 25 years, on products featuring our mattress and seating springs.

To experience the AGRO difference in your products, please contact our sales team.
